Presentation Title: Network Transformation: Are We Ready for 5G and Edge Clouds?	
Speaker's Email:	
Abstract: We have made great progress in our NFV journey to drive a more flexible and nimble network infrastructure. As we get ready for 5G transition and 5G enabled Edge Services, with massive amounts of data generated by billions of connected devices, we have more work to do to fulfill the promise of NFV, and drive our industry towards Cloud Native solutions. In this presentation, Rajesh will outline the work Intel is driving in collaboration with other industry leaders to address the challenges of building Cloud Native solutions to unleash the full potential of 5G.
